

# Managed Cybersecurity

Protect your business from  
evolving cyber threats

Protect your business with proactive, cybersecurity solutions designed for today's digital world.

Through continuous monitoring and leading threat intelligence, and a security team that understands enterprise operations, Reflex helps you stay protected, compliant, and in control without adding a operational burden to your team.

## **EARLY DETECTION**

Continuous monitoring and threat intelligence designed to identify suspicious activity early before it escalates into business disruption.

## **RAPID RESPONSE**

Clear escalation paths and incident response processes that focus on containment, impact reduction, and fast decision-making.

## **PRACTICAL GUIDANCE**

Actionable recommendations from security specialists who understand real environments not generic reports or theory.

## The challenges we solve

<p><b>Lack of visibility into cyber risk</b></p>  <p>We help you understand where your real exposure lies and what actually needs attention.</p>	<p><b>Alert overload, no follow-through</b></p>  <p>We handle the triage and response, so threats don't slip through the cracks.</p>	<p><b>Staff falling for phishing and scams</b></p>  <p>Our microlearning and simulations turn human error into human defence.</p>	<p><b>Worried about what happens during an attack?</b></p>  <p>Our expert response team steps in fast to contain damage and help you recover.</p>
