

Advanced Networking

Stay connected. Stay in control.

We know that business performance depends on secure, fast, and reliable connectivity, especially across multiple locations.

Our networking solutions are designed to reduce downtime, simplify management, and give you visibility and control over your networking environment.

HANDLED END-TO-END

We handle the complexity, so you only deal with us.

CUSTOM FIT CONNECTIVITY

Your business isn't off-the-shelf, neither is your network. We build it around your operations, pace, and growth.

WE'RE ALREADY ON IT

Our 24/7 NOC identifies issues and outages.

The challenges we solve

Lack of accountability when networks experience downtime

Reflex provides 24/7 monitoring, managed failover, and direct escalation paths to keep you online and in control.

Unclear ownership or cost visibility across the network

We offer clear accountability, live dashboards, and simplified management.

A network that can't scale with your business growth

Our SD-WAN and mobile solutions adapt with your needs, quickly and securely.

Infrastructure limitations due to landlords or site constraints

Reflex navigates vendor challenges for last-mile solutions.

Our product offering at a glance

Service Area	Description
Software-Defined Wide-Area Network (SD-WAN)	Centralised control across locations with dynamic routing and scalability. Optimises network performance, reduces costs, and ensures business continuity by prioritising critical applications and enhancing reliability.
Managed Hosted Firewall & Secure Connectivity	24/7 monitored firewall and VPN access built for compliance and resilience. Protects sensitive data, strengthens security posture, and reduces the need for in-house management.
Wired (LAN) & Wireless (Wi-Fi) Networks	Design, implementation, and management of reliable internal wired and wireless networks that support modern workplaces, connected devices, and cloud-based applications.
Enterprise Connectivity & Internet	High-speed, SLA-backed connectivity over fibre, microwave, or LTE. Ensures reliable, high-performance internet access optimised for business-critical applications.
Mobile Data	Secure mobile connectivity for hybrid and remote teams. Delivers reliable access to business systems while maintaining data protection and mobility across networks.

Your benefits with Reflex

- ✓ Confidence in a secure, scalable network.
- ✓ Stability and uptime across all your locations.
- ✓ Peace of mind with a team that acts before problems escalate.

- ✓ Fast, reliable connections that just work
- ✓ Visibility into network health and performance
- ✓ Streamlined IT operations and reduced admin load

Get in touch with Reflex and give your enterprise business the connectivity advantage it deserves.

Let's connect and get your business moving at full speed!
